752S	754 cc	International naked bike; market dependent
TNT 135	134.7 cc	Mini bike; selected international markets

Notes and sources

• cc means cubic centimetres, a measure of engine displacement. Model names sometimes round the capacity, so a model called “500” may have a measured displacement slightly below or above 500 cc.

• The current/recent India range commonly reported comprises Leoncino 500, 502C, TRK 502 and TRK 502X, all using a 500 cc-class parallel-twin engine.
